

Patient Name:	John Doe	Specimen ID:	SPEC-2026-89421
Age / Gender:	34 Years / Male	Collected Date:	01-Jun-2026 08:30 AM
Patient ID:	PID-992341	Received Date:	01-Jun-2026 10:15 AM
Referred By:	Dr. Sarah Jenkins, MD	Reported Date:	01-Jun-2026 04:45 PM

COMPLETE BLOOD COUNT (CBC)

INVESTIGATION / PARAMETER	OBSERVED VALUE	FLAG	REFERENCE INTERVAL	UNITS
Total Leukocyte Count (WBC) Total white blood cell count	7.4	Normal	4.0 - 11.0	10 ³ / μL
Red Blood Cell Count (RBC) Total erythrocyte count	4.2	Low	4.5 - 5.9	10 ⁶ / μL
Hemoglobin (Hb) Oxygen-carrying protein	12.8	Low	13.5 - 17.5	g/dL
Packed Cell Volume (PCV) / Hematocrit Percentage of blood volume occupied by RBCs	38.5	Low	41.0 - 50.0	%
Mean Corpuscular Volume (MCV) Average volume of a single RBC	91.6	Normal	80.0 - 100.0	fL
Mean Corpuscular Hemoglobin (MCH) Average amount of Hb per RBC	30.4	Normal	27.0 - 33.0	pg
Mean Corpuscular Hb Conc (MCHC) Average concentration of Hb in a given volume of RBCs	33.2	Normal	32.0 - 36.0	g/dL
RBC Distribution Width (RDW-CV) Variation in RBC size	14.2	Normal	11.6 - 14.6	%
Platelet Count Thrombocyte count	465	High	150 - 450	10 ³ / μL
Mean Platelet Volume (MPV) Average size of platelets	10.1	Normal	9.0 - 13.0	fL

WBC DIFFERENTIAL COUNT

SEGMENT / CELL TYPE	OBSERVED VALUE	FLAG	REFERENCE INTERVAL	UNITS
Neutrophils	62.0	Normal	40.0 - 75.0	%
Lymphocytes	28.0	Normal	20.0 - 45.0	%
Monocytes	6.5	Normal	2.0 - 10.0	%
Eosinophils	3.0	Normal	1.0 - 6.0	%
Basophils	0.5	Normal	0.0 - 2.0	%

Laboratory Interpretative Notes:

- **Anemia Evaluation:** Red Blood Cell count, Hemoglobin, and Hematocrit values fall marginally below the normal reference ranges for an adult male. Microcytosis is not prominent (MCV is normal), indicating a normocytic pattern. Suggest clinical correlation with iron profiles or serum B12/Folate evaluations.
- **Reactive Thrombocytosis:** Platelet count is slightly elevated at $465 \times 10^3/\mu\text{L}$. This mild elevation is frequently reactive and can be secondary to tissue inflammation, minor tissue trauma, or iron deficiency. Recommend re-testing in 2-4 weeks.
